

AVG Identity Protection™

Up-to-the-minute protection for online banking and shopping

The more time you spend on line, the more important it is to keep your personally-identifiable information safe from identity thieves. AVG Identity Protection sits on top of your existing anti-virus, shielding your passwords, credit card numbers, and other digital valuables from prying eyes.

AVG Identity Protection™ goes way beyond the typical identity theft protection software. Not only will we keep you safe from online threats - we're also able to see when anything potentially bad might be happening on your PC, and stop it before it can do any damage.

AVG Identity Protection™ enhances any anti-virus, not just AVG. Here's how:

Your identity is safe whenever you go online

New and unknown threats are kept out of your PC

All this plus free online expert support around the clock and around the globe

Features

AVG Identity Protection™ uses behavioral analysis to make sure all the programs running on your PC are operating the way they should. If it spots something suspicious, it shuts that activity down, preventing any possible identity theft.

Antivirus is no longer enough

Every day, tens of thousands of new viruses appear in security software companies research labs. Traditional security software products just can't keep up. You need an additional layer of protection when you go online. Yes, you still need that traditional protection against the viruses and spyware that are already out there. But AVG Identity Protection goes a step further by adding protection from new and unknown threats.

No need to remember to schedule scans or updates

Because AVG Identity Protection works by spotting and blocking suspicious behavior on a continuous basis, there's no need to worry about whether you've

downloaded the latest signature updates for your anti-virus or scheduled a scan today.

Easy to install and manage

AVG Identity Protection is a small (10MB) download, so you can be up and running in no time. And once it's in place, AVG Identity Protection uses a tiny amount of your computer's processing power to provide that always-on protection.

When you've installed AVG Identity Protection, it goes to work right away - there's no need to do a thing. But if you want to tweak your settings or find out more about how each component works, everything is accessible through the easy-to-use interface. Just click the appropriate icon and explore!
